

How to open a ghg file

A “.ghg” file is a zipped file. Here are the step to open it:

1. Copy one of the ghg file to a new folder so that you will not modify your raw data.
2. Select the copied ghg file in File Explorer and then rename the extension name “.ghg” to “.zip”

3. Select the zip file, right click the mouse, and then use the “Extract All” to unzip the ghg file

4. Find and open the raw data files from the unzipped file folder

EC training > 2015-06-08T000000_LERS-75H-2035

Name	Date modified	Type
 2015-06-08T000000_LERS-75H-2035.data	6/8/2015 12:30 AM	DATA File
 2015-06-08T000000_LERS-75H-2035.metadata	6/8/2015 12:00 AM	METADATA File
 2015-06-08T000000_LERS-75H-2035-biomet.data	6/8/2015 12:30 AM	DATA File
 2015-06-08T000000_LERS-75H-2035-biomet.met...	6/8/2015 12:00 AM	METADATA File

Another way is to download open source and free “7-zip” from <https://www.7-zip.org/download.html> an then use it to unzip a “.ghg” file directly as shown .
